## Unit 3: Expressions

### Across

- Shows how many times to multiply the base number by itself
- A specific order in which operations must be performed in order to get the correct solution to a problem
- A number which multiplies the variable
- A symbol, usually a letter, that represents a number
- One part of an algebraic expression that may be a number, a variable, or a product of both

### Down

- A group of variable(s), operation(s), and/or number(s) that represent a quantity. Do NOT contain equal signs.
- A quantity that has a fixed value that does not change, such as a number
- Terms whose variables (and exponents) are the same
